Birthday: 11th July 2005 (Age 21)

SUMMARY

Software Engineering graduate with **Second Class: Division I**, experienced in software development, full-stack application development, and game development. Skilled in designing, developing, testing, and debugging software solutions, with hands-on experience in **Java, Unreal, Android, React Native, Unity, C#, RESTful APIs, and database technologies**. Demonstrated leadership experience as a **Software Engineer Team Lead**, coordinating development activities, managing teams, mentoring junior members, and collaborating with stakeholders. Passionate about building scalable, user-focused solutions and solving complex technical challenges.

EDUCATION

Diploma in Game Programming Mogo Media Academy	2026 - Present
B.Sc. in Software Engineering (Top Up) Birmingham City University (Java Institute), UK <i>Second Class: Division I</i>	2024 - 2026
Higher Diploma in Software Engineering UK Awards (Java Institute)	2023 - 2024
Diploma in Software Engineering UK Awards (Java Institute)	2022 - 2023
Advanced Certificate Elocution of English	
School Education Highlands College – Nugegoda, Sri Lanka. Thurstan College – Colombo 07, Sri Lanka.	

SKILLS

- **Languages:** Java | PHP | JavaScript | HTML & CSS | Arduino | C# | C++ (UE Blueprints)
- **Technical Fields:** Full Stack Web Development | Android Development | Game Development | Backend Development | IOT
- **Databases:** MySQL | SQLite | Firebase | Hibernate
- **Tools & Services:** Git | Postman | Android Studio | Visual Studio Code | IntelliJ | NetBeans | Unity | Unreal Engine
- **Frameworks:** React Native | React.js

Working Experience

Software Engineer / Team Lead Intern – Gamage Recruiters (PVT) Ltd

- Contributed to end-to-end software development activities including requirement analysis, system design, development, testing, debugging, and deployment support.
- Promoted to **Team Leader** based on technical performance, leadership, initiative, and ownership of development tasks. Coordinated development activities, assigned tasks, monitored team progress, and supported sprint and delivery cycles.

- Participated in stakeholder meetings, requirement gathering, project updates, and communication between technical and non-technical teams.
- Mentored junior interns and new team members while providing technical guidance and supporting their onboarding.
- Contributed to code reviews, technical discussions, and enforcement of software engineering best practices and quality standards.

Role: Software Engineer Assistant Team Lead Intern → Team Leader

Duration: December 2025 – June 2026

PROJECTS

3D Adventure Game – Knight vs Monster (Unity)

2025 June

- Designed and developed a **3D action-adventure game** where a knight battles monsters in a jungle environment.
- Integrated **realistic 3D assets, sound effects, and animations** for an immersive gameplay experience.
- Implemented **player combat mechanics**, enemy AI, and health systems using Unity and C#.
- Enhanced gameplay with **environmental effects** (jungle terrain, ambient sounds) and optimized performance.
- **Tech Stack:** Unity, C#, NavMesh, 3D Assets, AudioFX.
- **Ref:** <https://www.youtube.com/watch?v=amgXgWQZdts>

Unity Game Project – 3D Action Shooter

2026 July

- Developed a 3D action shooter game in Unity featuring player movement, weapon systems, enemy AI, and combat mechanics.
- Implemented multiple weapons including pistol and RPG mechanics, with ammunition, reloading, projectile pooling, explosions, and damage systems.
- Developed enemy AI using NavMesh-based navigation with chase and attack behaviors.
- Implemented gameplay systems including helicopter landing sequences, air strikes, health management, audio effects, and interactive environments.
- Optimized gameplay performance using object pooling for bullets and rockets and created responsive game UI for health, ammunition, and gameplay indicators.
- **Tech Stack:** Unity, C#, NavMesh, Unity Input System, Character Controller, Object Pooling, Animation, Particle Systems, UI

Food – Android App

2025 Jan - 2025 Feb

- Aims to design and develop a **smart food e-commerce mobile app** dedicated to food lovers.
- Enables users to **browse, order, and pay** for their favorite foods seamlessly.
- Includes a **dedicated customer** app for buyers.
- Exclusively launched as a **food-only e-commerce platform**, ensuring a tailored experience for food buyers.
- **Tech Stack:** Java (Android), Firebase, SQLite, Hibernate, MySQL, popular Android UI/UX

Sandow – Android App

- Aims to design and develop a **fitness and gym mobile app** that motivates users in their workout journey.
- Provides **individual workout guidance** with tailored exercise plans and tracking.
- Integrates **vibration sensor feedback** to give users a real-time responsive feel during workouts.
- Offers a **personalized fitness companion experience**, helping users stay consistent and achieve goals.
- **Tech Stack:** Java (Android), Firebase, SQLite, Android Sensor APIs, modern UI/UX libraries
